## Section 2: The Teaching Experience

### 2. What was good about this placement?

Seeing LOTS of patients - that was excellent. Running own clinics (under supervision) was an excellent way to practice communication, diagnostic, and Mx skills. Overall a very positive experience.

Well organized placement. Everyone was helpful and friendly. Got a lot opportunities to practice communication skills and clinical skills. Feedbacks given at the end of sessions.

### 3. Was there something you thought should be changed to improve it? If so, what would you suggest.

Not sure how this might be implemented given time constraints, but, a few minutes soon after each clinic for the supervising doctor to feedback, or discuss any key issues, would be great - my experience is that a substantial fraction of the learning comes through the temporaneous feedback from seniors.

### 4. Can you give any examples of good practice in teaching?

Dermatology teaching - Hx and Ex skills, esp for e.g. psoriasis

Give feedback to students so they can improve their skills Showing good examples as a clinician in providing the best care for the patients.

**19.** Do you have any other comments? e.g. teaching, patient contact, feedback, organisation.

Dr Parmar and Dr Naqvi were excellent in making sure that our learning needs are met. Having a good range of patient contacts have improved my knowledge and make me more confident with my clinical skills.

This is a first rate teaching practice. We felt welcomed from the very beginning of our placement, and the staff were keen to teach and support us. We had great exposure to patients, and ample opportunity to practice clinical skills
