## Section 2: The Teaching Experience

2. What was good about this placement?

Depending on the clinic there was some opportunity to talk to and examine patients.§§

3. Was there something you thought should be changed to improve it? If so, What would you suggest.

There was little opportunity to clerk patients. In future it would be good if patients with neurological/psychiatric conditions could be booked in to see students.

Would be good to bring in specific patients with neuro/psych problems for us to clark. Have a free room for us to clark any patients that come in

4. Can you give any examples of good practice in teaching?

<b>11. Do you have any other comments? e.g. teaching, patient contact, feedback, organisation.</b>			
<p>The majority of time at the placement was spent passively observing clinics despite saying to the doctors I was sitting in with that I wanted practice taking histories and examining patients. On one occasion a patient was happy to stay and talk to me about their condition after their appointment. However, when I asked for a room to use I was told there was none available. Compared to other GP placements I have been on, this placement was particularly poor in meeting the learning objectives set out by the university.</p>
